1. Includes the following towns; Barton, Burke, Coventry, Glover, Lowell, Newport City, and Orleans.
2. Participated in one Coventry HHW collection event and held one collection event in Burke.
3. Franklin and Highgate hold their events together and share costs. HHW data is recorded in Highgate's entry.

SUMMARY

Beginning 7/1/11, all e-waste was tracked through the E-cycles Program

Household estimates were derived from the US Census Bureau: *Population, Housing Units, Area and Density: 2010*.

Conversion factors used for 2012 HHW data are: 1 gallon = 8 pounds; one 55-gallon drum = 440 pounds; 1 Gaylord or pallet = 440 pounds; 1 linear foot = 0.125 pounds.

This information is a collection of Household Hazardous and Conditionally Exempt Generator (HHW/CEG) Waste surveys completed by various Solid Waste Districts, Alliances and Municipalities throughout the State Of Vermont. All information compiled and represented here was reported by representatives of the Solid Waste District, Alliance and/or Municipality. Every attempt has been made to provide accurate information on Vermont's Household Hazardous Waste and Conditionally Exempt Generator waste collections. Multi-entity collections and districts that provide collection services for other districts or municipalities have reported their collection numbers only (to help prevent any double counting). If you have any questions, suggestions, or corrections, please feel free to contact Mia Roethlein at (802) 522-5926, or e-mail at: mia.roethlein@state.vt.us.
